―――――― OR ――――――

SIGNUP

After sign up and login , user will be directed to the list view in which will show restaurants at 60612 by default.
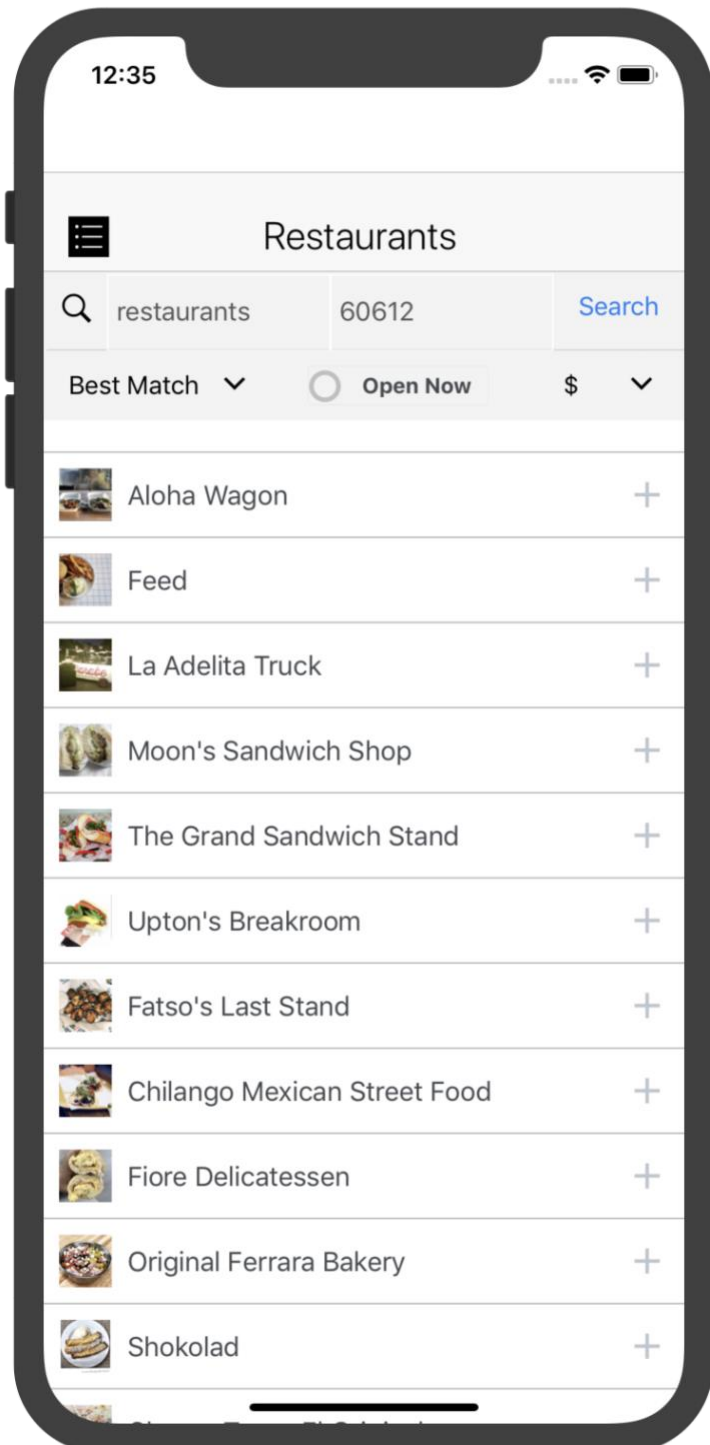

They can filter the list by selecting option on the second row.
Once they select any of the filter the list will be rerendered.
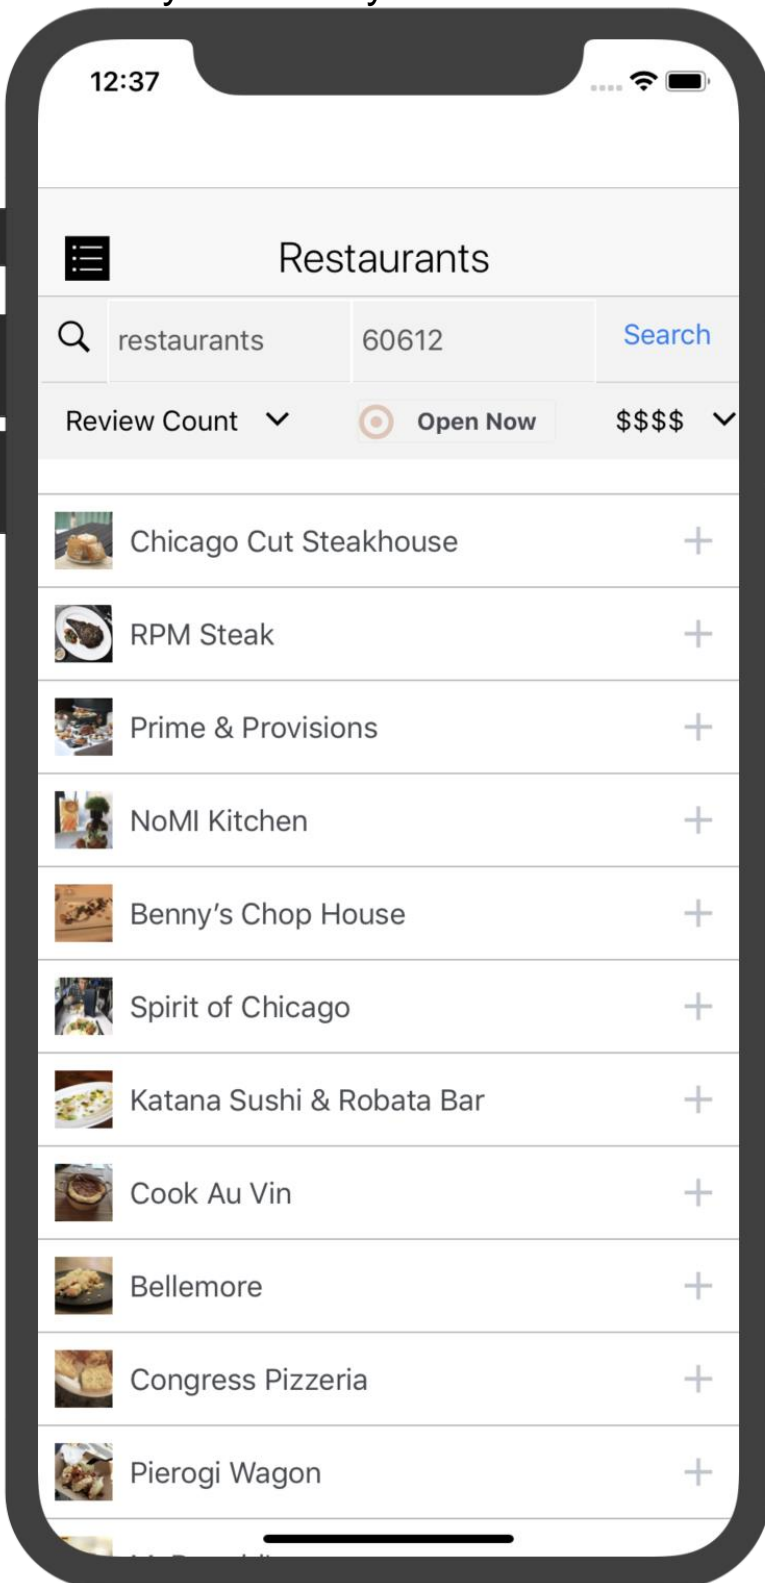

User can also search other lotion and dish they want by filling the input. The user filter preferences will be remembered.
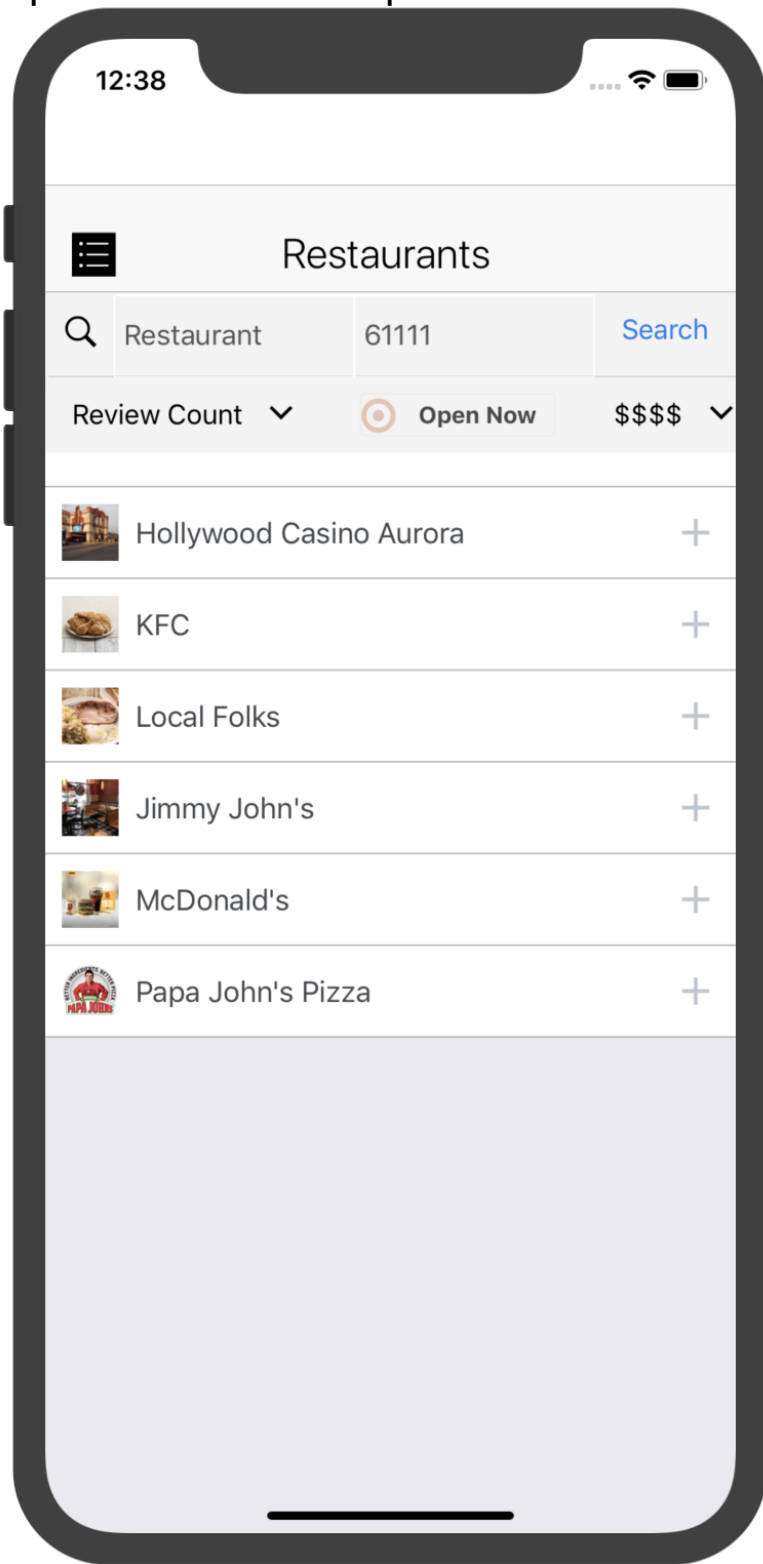

User can add restaurant to their list by clicking on the plus button. The List will be stored in firebase and will be restore everytime user relogin.
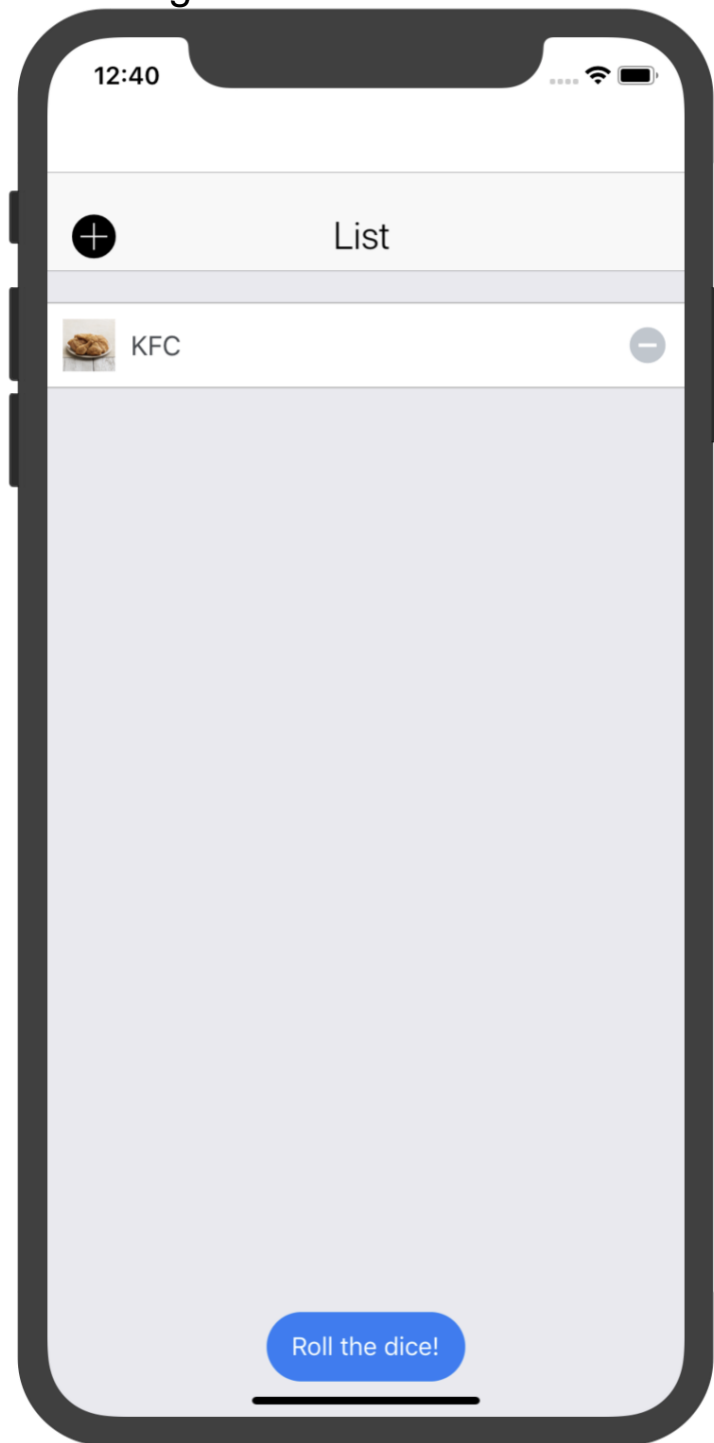

They can add more by clicking the plus navigation button on the left top corner of the screen.
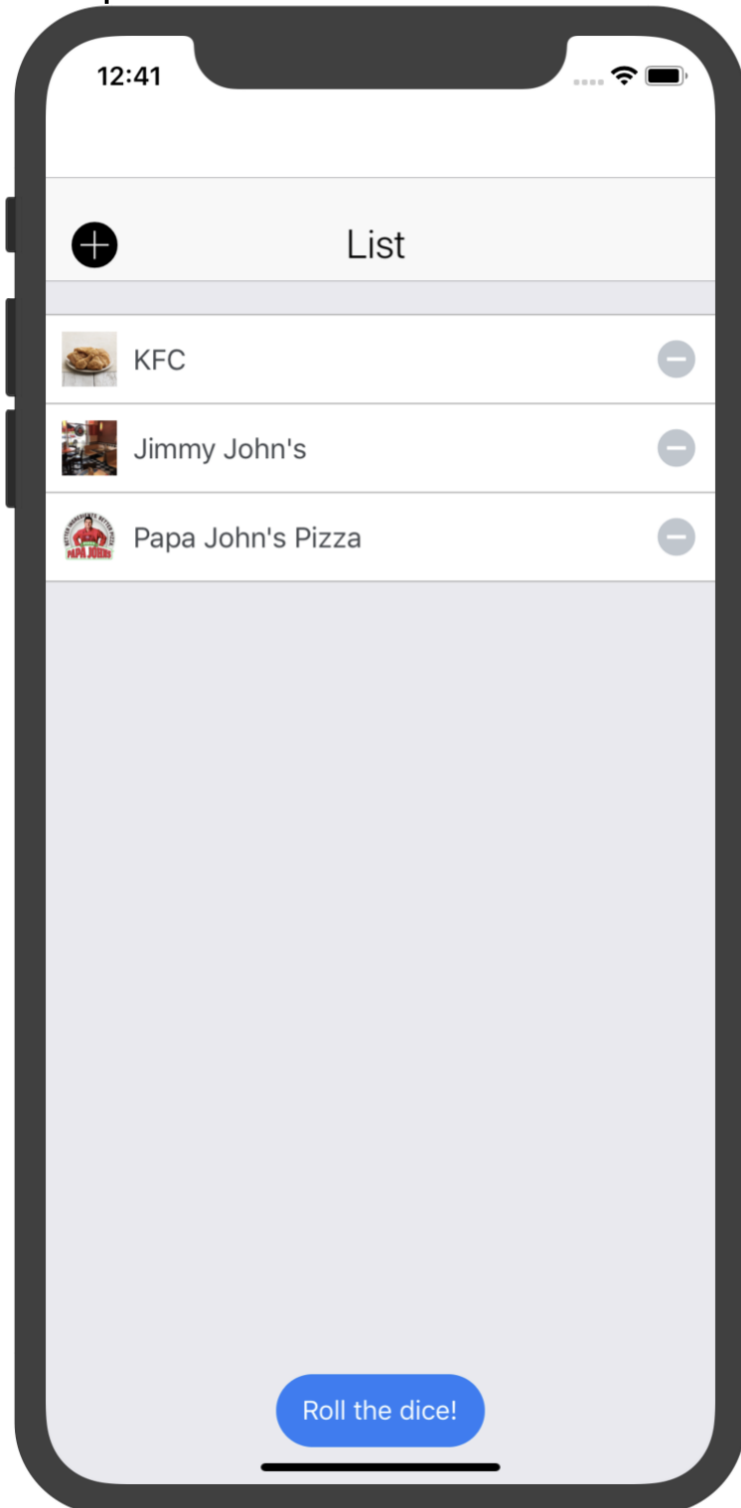

After selecting all restaurants they want, they can click on the roll the dice button at the bottom center of the screen which will randomly select a restaurant from the list and render it in a restaurant detail page.
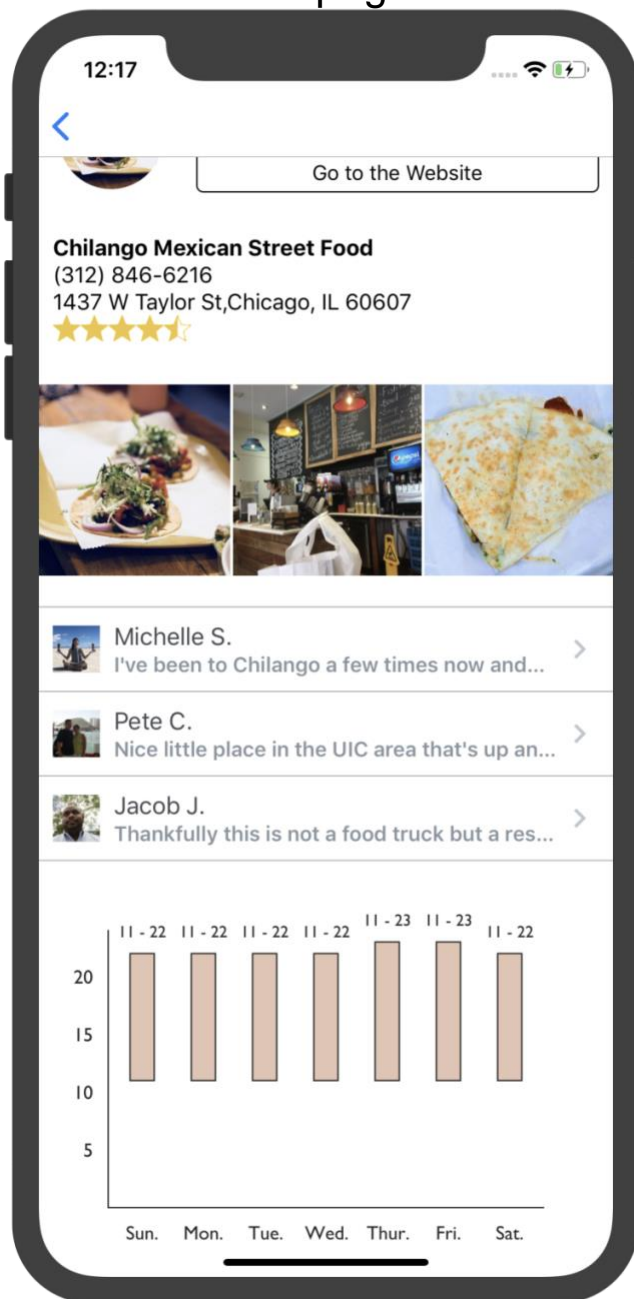

If the user is not satisfied with the random result, they can go back by clicking the go back button on the left top corner and randomize again.
